Condensed Annual Financial Statements for the year ended 31 December 2025

Director's Responsibilities and Approval

The director is required by the Companies Act of South Africa to maintain adequate accounting records and is responsible for the content and integrity of the condensed annual financial statements and related financial information included in this report. These condensed annual financial statements have been prepared in accordance with the IFRS for SMEs® Accounting Standard as issued by the International Accounting Standards Board (IASB®) and it is their responsibility to ensure that the condensed annual financial statements satisfy the financial reporting standards with regards to form and content and present fairly the statement of financial position, results of operations and business of the company, and explain the transactions and financial position of the business of the company at the end of the financial year. The condensed annual financial statements are based upon appropriate accounting policies consistently applied throughout the company and supported by reasonable and prudent judgements and estimates.

The director acknowledges that they are ultimately responsible for the system of internal financial control established by the company and places considerable importance on maintaining a strong control environment. To enable the director to meet these responsibilities, the director sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the company and all employees are required to maintain the highest ethical standards in ensuring the company's business is conducted in a manner that in all reasonable circumstances is above reproach.

The focus of risk management in the company is on identifying, assessing, managing and monitoring all known forms of risk across the company. While operating risk cannot be fully eliminated, the company endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The director is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the condensed annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss. The going-concern basis has been adopted in preparing the financial statements. Based on forecasts and available cash resources the director has no reason to believe that the company will not be a going concern in the foreseeable future. The condensed annual financial statements support the viability of the company.

The condensed financial statements set out on pages 4 to 17 which have been prepared on the going concern basis, were approved by the director and were signed on 23 July 2026.

Condensed Financial Statements for the year ended 31 December 2025

Accounting Policies

1. General information

Lendplus Technology (Pty) Ltd ('the company') is a short term credit provider, providing small value credit and ancillary services to individuals.

The company is incorporated as a private company and domiciled in South Africa. The address of its registered office is 10th Floor Offices, 2 Long Street, Cape Town, Western Cape, 8000.

2. Basis of preparation and summary of significant accounting policies

The financial statements of Lendplus Technology (Pty) Ltd have been prepared in accordance with the IFRS for SMEs[®] Accounting Standard as issued by the International Accounting Standards Board (IASB)[®] and the Companies Act of South Africa. The financial statements have been prepared under the historical cost convention, except where stated otherwise. They are presented in South African Rand.

The preparation of financial statements in conformity with the IFRS for SMEs[®] Accounting Standard as issued by the International Accounting Standards Board (IASB)[®] requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 3.

The principal accounting policies applied in the preparation of these condensed annual financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Foreign currency translation

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in profit or loss within 'finance income or costs'. All other foreign exchange gains and losses are presented in profit or loss within 'other (losses)/gains – net'.

2.2 Property, plant and equipment

Property, plant and equipment is stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the director.

The company adds to the carrying amount of an item of property, plant and equipment the cost of replacing parts of such an item when that cost is incurred if the replacement part is expected to provide incremental future benefits to the company. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the period in which they are incurred.

Depreciation on other assets is charged so as to allocate the cost of assets over their estimated useful lives, using the straight-line method. The estimated useful lives range as follows:

Lendplus Technology (Pty) Ltd

(Registration Number 2023/805154/07)

Condensed Financial Statements for the year ended 31 December 2025

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Asset class	Useful life / depreciation rate
Office equipment	3 years
Computer equipment	3 years

The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted prospectively if appropriate, if there is an indication of a significant change since the last reporting date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within 'other gains / (losses)' in the statement of comprehensive income.

2.3 Financial instruments

Loan to (from) director, manager or employee

The loan to director, manager or employee is classified as a debt instrument, and is initially measured at transaction price including transaction costs and subsequently measured at amortised cost using the effective interest method.

Trade and other receivables

Trade and microloan receivables are recognised in the Statement of Financial Position when the entity becomes a party to the contractual provisions of the loan agreement. Receivables are initially measured at the transaction price, which typically represents the net amount advanced to the borrower plus any directly attributable transaction costs. At the end of each reporting period, the carrying amounts of trade and other receivables are reviewed to determine whether there is any objective evidence that the amounts are not recoverable. If so, an impairment loss is recognised immediately in profit or loss.

Trade and other receivables are classified as debt instruments at amortised cost.

Loans receivable

Loans receivable are recognised initially at the transaction price, including transaction costs except where the asset will subsequently be measured at fair value.

Debt instruments are subsequently stated at amortised cost. Interest income is recognised on the basis of the effective interest method and is included in finance income.

Commitments to receive a loan that meet the conditions in paragraph 11.8(c) are measured at cost less impairment.

Cash and cash equivalents

Cash and cash equivalents includes cash on hand, demand deposits and other short-term highly liquid investments with original maturities of three months or less.

Condensed Financial Statements for the year ended 31 December 2025

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Impairment of financial assets

The Company has elected, in accordance with Section 11.2(b) of the IFRS for SMEs® Accounting Standard as issued by the International Accounting Standards Board (IASB)®, to apply the recognition and measurement requirements of IAS 39 in accounting for its financial instruments.

The Company recognises an allowance for expected credit losses on financial assets. The expected credit loss allowance represents management's estimate of credit losses arising from the inability of customers to settle amounts owing to the Company.

The allowance is determined using a provision matrix based on historical credit loss experience, adjusted for current and forward-looking information that may affect customers' ability to settle outstanding balances.

Trade receivable balances are grouped according to shared credit risk characteristics and assessed based on the ageing of outstanding balances. Factors considered include historical default rates, the financial position of customers, prevailing economic conditions, industry trends and other relevant forward-looking information.

The impairment loss recognised in profit or loss is the amount required to adjust the loss allowance at the reporting date to the level of expected credit losses.

A trade receivable is written off when there is no reasonable expectation of recovery. Subsequent recoveries of amounts previously written off are recognised in profit or loss in the period in which the recovery occurs.

The carrying amount of trade receivables in the statement of financial position is presented net of the expected credit loss allowance.

Trade and other payables

Trade payables are obligations on the basis of normal credit terms and do not bear interest.

Trade payables denominated in a foreign currency are translated into South African Rand using the exchange rate at the reporting date. Foreign exchange gains or losses are included in other income or other expenses.

Trade payables are recognised initially at the transaction price and subsequently measured at amortised cost using the effective interest method.

Loans payable

Loans payable are recognised initially at the transaction price, including transaction costs except where the liability will subsequently be measured at fair value.

Loans payable denominated in a foreign currency are translated into South African Rand using the exchange rate at the reporting date. Foreign exchange gains or losses are included in other income or other expenses.

Debt instruments are subsequently stated at amortised cost. Interest expense is recognised on the basis of the effective interest method and is included in finance costs.

Loans payable are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Lendplus Technology (Pty) Ltd

(Registration Number 2023/805154/07)

Condensed Financial Statements for the year ended 31 December 2025

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Issued capital

Ordinary shares are classified as equity.

Equity instruments are measured at the fair value of the cash or other resources received or receivable, net of the direct costs of issuing the equity instruments. If payment is deferred and the time value of money is material, the initial measurement is on a present value basis.

2.4 Tax

The tax expense for the year comprises current and deferred tax. Tax is recognised in profit or loss, except that a change attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the reporting date in the countries where the entity operates and generates taxable income.

Deferred income tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements and on unused tax losses or tax credits in the entity. Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences.

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised.

Deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

2.5 Leases

Definition

A lease is an agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time. A finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred. An operating lease is a lease other than a finance lease.

Classification

A lease is classified as a finance lease when it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease when it does not transfer substantially all the risks and rewards incidental to ownership.

Operating leases as lessor

Assets subject to operating leases are included in the statements of financial position according to the nature of the asset.

Lendplus Technology (Pty) Ltd

(Registration Number 2023/805154/07)

Condensed Financial Statements for the year ended 31 December 2025

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Lease income from operating leases is recognised in income on a straight-line basis over the lease term, unless another systematic basis is more representative of the time pattern in which use benefit derived from the leased asset is diminished.

Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease income.

2.6 Provisions

Provisions are measured at the present value of the amount expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

2.7 Revenue

Revenue is measured at the fair value of the consideration received or receivable. Revenue is shown net of value-added tax, returns, rebates and discounts.

Interest income is recognised using the effective interest method.

Due to the very short-term nature of the loans, loan origination and administration fees charged to applicants upon the successful processing of the loan are recognised upon the disbursement of funds.

Collection fees and penalties are recognised as revenue when collection procedures are instituted.

When a microloan is written off, the cessation of interest revenue recognition occurs. Any subsequent recoveries on written-off loans are recognised in profit or loss on a cash-received basis.

2.8 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for services rendered by employees or for the termination of employment.

Short-term employee benefits are employee benefits (other than termination benefits) that are expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service.

2.9 Borrowing costs

All borrowing costs are recognised in profit or loss in the period in which they are incurred.

Lendplus Technology (Pty) Ltd

(Registration Number 2023/805154/07)

Condensed Financial Statements for the year ended 31 December 2025

Accounting Policies

3. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

3.1 Critical accounting estimates and assumptions

The company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

3.1.1 Useful lives and residual values

The useful lives and residual values of property, plant and equipment are estimated by management based on generally accepted trends within the market. Small assets, generally for R1,000 or less are estimated to have a useful life of 1 year and are written off in full on date of recognition.

3.1.2 Estimated credit loss allowances

In applying its financial instruments policy under Section 11.2(b) of IFRS for SMEs, the Company estimates the impairment allowance required for trade receivables. The estimate is based on historical loss experience, customer credit risk and other available information regarding recoverability. Actual outcomes may differ from these estimates and may result in adjustments to the impairment allowance in future periods.

22,747,692

11. Loans payable

Loans payable comprise:

Loans payable

157,199,605

70,668,272

The loans bear interest, are secured and long-term in nature.

12. Contingencies

The company has concluded a contract which remains in effect from 1 March 2025 to 31 May 2027. On termination the company is liable to pay an amount equal to the lost profits for the remainder of the contract.

13. Events after the reporting date

The director is not aware of any matter or circumstance arising since the end of the financial year to the date of this report that could have a material effect on the financial position of the company.

14. Going concern

The condensed annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The company incurred a net loss for the year ended 31 December 2025 of R120,436,168 (2024 loss: R1,792,455) and, as at that date its total liabilities exceeded its total assets by R123,741,895 (2024: R3,305,727). Despite these losses, the company is still able to settle its debts in the ordinary course of business and it has continuing support from LLC "Lineura" to assist with finance should it be necessary.

15. Comparative information

The prior period covers nine months and is therefore not fully comparable with the current twelve-month reporting period. In addition, certain expenses have been reclassified in the current year to enhance management reporting, control and disclosure. Accordingly, the classification of expenses in the current year may not be directly comparable to the prior period presentation. The reclassification has no effect on the entity's reported results, financial position or cash flows.
